Professional Summary

Flutter developer with experience building production-ready cross-platform mobile applications using Flutter, Firebase/Supabase. Skilled in REST APIs, BLoC, Clean Architecture, authentication, CI/CD, and payment integration. Passionate about creating scalable, maintainable mobile applications.

Education

BSc (Hons) Computer Science - Herald College Kathmandu
2022-2025

Skills

- Languages: Dart, JavaScript
- Frameworks: Flutter, Node.js, Express
- State Management: BLoC, GetX
- Backend: REST API, MongoDB
- Tools: Git, GitHub Actions, Firebase,
- Payments: Stripe, eSewa
- Architecture: Clean Architecture, Modular Design

Experience

DarkMatter Production

Flutter Developer Intern

- Developed cross-platform mobile application features using Flutter, including user authentication, shopping cart functionality, and Stripe payment integration.
- Integrated RESTful APIs for data retrieval and real-time synchronization, implemented secure local data storage, and managed application state using the BLoC pattern.
- Built responsive, reusable UI components following Material Design principles while adhering to Clean Architecture and a modular code structure for maintainability.
- Automated Android and iOS build and deployment workflows with GitHub Actions CI/CD, and published and maintained application releases on both platforms.

Projects

Blood Link – Blood Donation Management System (FYP)

Tech: Flutter • Node.js • MongoDB • Google Maps • eSewa

- Developed a multi-blood bank management platform.
- Built real-time blood inventory tracking with REST APIs.
- Integrated Google Maps for donor and blood bank search.
- Implemented JWT authentication and role-based access.
- Integrated eSewa for secure online donations.

Offline TODO- Task Management Application (Personal)

Tech: Flutter • Sqflite

- Developed an offline-first task manager.
- Implemented local storage using Sqflite.
- Built CRUD functionality with real-time updates.
- Designed a clean and responsive user interface.
-

365 days - Ecommerce Application

Tech: Flutter • BLoC • REST API • Firebase • Stripe

- Developed a cross-platform e-commerce application.
- Integrated REST APIs for products, orders, and profiles.
- Implemented BLoC for scalable state management.
- Integrated Stripe payment processing.
- Automated Android and iOS builds with GitHub Actions.

Nobigo - Language Learning Application

Tech: Flutter • BLoC • REST API • Firebase

- Built responsive Flutter UI components.
- Integrated REST APIs for real-time data.
- Implemented BLoC state management.
- Secured user data with Flutter Secure Storage.
- Published Android and iOS releases.
